**TRANSLOG Connect Congress**, Central Eastern Europe's annual market leading cross-industrial B2B business congress for transportation, logistics and supply chain management professionals will open its doors for the 14th time this November to the elite of logistics and supply chain professionals and decision makers from all over Europe.

From vision to reality - how to make digital transformation a success, global supply chains under pressure - navigating geopolitical disruptions, enhancing supply chain resilience through digital technologies, and people fluctuation and motivation in logistics, are some of the most pressing business challenges currently, and it is not a surprise that decision makers at TRANSLOG will also focus on these areas, in order to find answers, solutions as well suppliers that are able to meet their current requirements.

With its forward looking and future-orientated topics and audience, the event seeks to create an inspiring, live environment to achieve all the above, through various networking platforms, from influential keynote talks, engaging panel discussions, networking lunches, to pre-scheduled and pre-qualified high level business meetings. The Congress also features an exhibition area where leading companies such as DSV, cargo-partner, Transporeon, S2data, DP World, Andreas Schmid, A-Safe, Pallet Solution, EURO Team, Cabka and many more present their newest technologies and services.

As usual, TRANSLOG's Meeting Scheduler platform helps supply chain professionals and decision makers to make most of their time at the event, by enabling them to efficiently liaise and arrange business meetings all in advance prior to the event, as well as to choose presentations and all other networking programs they wish to take part in.

Make sure you do not miss out
